## Wishing all GURUs a very Happy Teacher's Day

**Teachers' Day** is a special day for the appreciation of teachers, and may include celebrations to honor them for their special contributions in a particular field area, or the community in general.

The idea of celebrating Teachers' Day took root in many countries during the 20th century; in most cases, they celebrate a local educator or an important milestone in education (for example, Argentina has commemorated Domingo Faustino Sarmiento's death on 11 September since 1915, while India has celebrated the birthday of **Dr. Sarvepalli Radhakrishnan (5 September)** since 1962, although Hindus, Jains and Buddhists have been honoring teachers by celebrating Guru Purnima for centuries. This is the primary reason why countries celebrate this day on different dates, unlike many other International Days.

Other countries have other dates, reason and celebration. To find more details, please browse the below link

### Free Barcode Label Design Application

The Freeware Barcode Label Design Application is an easy-to-use WYSIWYG barcode label printing software application that prints barcodes, text and graphics on standard laser and inkjet printers, as well as thermal transfer printers.

- This Free version supports the Code 39 and Extended Code 39 barcode types.
- The Standard version includes all the other popular barcode types including UPC, EAN, Code 128, and Interleaved 2 of 5 and Postnet.
- The Pro version includes 2D symbol types and GS1 DataBar.

All other functionality of this free barcode software application is the same as the standard version, including advanced features such as basic VB scripting, serial number and constant fields, integrated database connectivity and the ability to print labels from data stored in Microsoft Access, Excel or CSV files.

This Free License may be used by individuals and organizations that have a gross annual revenue of less than \$500,000 USD or are classified as nonprofit for tax purposes, excluding government and military organizations. This product may also be freely used by educational organizations, such as schools and universities. This freeware license is granted in the [Free License section of our License Agreement](#). Any other use requires a purchase of our [Barcode Label Software](#) to remain properly licensed.

Technical Support for the free software products is limited to online documentation, including the [knowledgebase articles](#) and [support forum](#). However, [Per-Incident Support](#) is available for purchase if more in-depth support is needed.
